Android / Flutter App Developer

11 years of Android App development experience in the payments, medical, web browser, dating App, IoT, and mobile advertisement industries.

Professional Experience

Software Engineer, Google — Sep 2021 - Present

- Owner of the Fitbit Pay for the Fitbit Android App including global payments and transit in Japan and Taiwan.
- Launched Google Wallet for Fitbit users, enabling migration from Fitbit Pay on the latest Fitbit Devices (Sense 2, Versa 4).
- Migrated Fitbit Android App codebase to Google's unified codebase.

Senior Software Engineer, AICS — Jan 2021 - Aug 2021

- Led a five-member team in developing a cross-platform mobile app using Flutter from scratch for hospital clients with a fast release cycle.
- In charge of QA, automation testing, and release processes to ensure quality and timely delivery.

Senior Software Engineer, Mozilla — April 2019 - Oct 2020

- Boosted user retention and MAU for Firefox Lite by implementing A/B testing and introducing new features.
- Refactored codebase with Kotlin, MVVM, and Clean Architecture.

Android Squad Leader, Grindr — Jan 2018 - April 2019

- Led a six-member squad in Beijing and Taipei offices to optimize and deliver new features for a dating app with 2.5 million DAU.
- Measured and optimized the App and page launch time by ~30% aiming for the P90 users.
- Helped to build the Taipei android team in Q3 2018.

Senior Android Engineer, Loopd (acquired by Aventri) — Nov 2014 - Oct 2017

- In an independent role for the Android side, conceptualized, designed, and developed Apps / SDKs from the ground up for the event operators and customers.

Software Developer, Waystorm — May 2012 – Oct 2014

- Developed software for one of the largest mobile advertising networks in Taiwan.
- Contributed to several outsourcing projects, including Apps and websites for a department store and movie theater.
