Android / Flutter App Developer

9 years of Android App development experience in the web browser, dating App,
IoT, and mobile advertisement industries.

Professional Experience

Senior Software Engineer, AICS — Jan 2021 - Present

- Leading a five-member App team building a cross-platform mobile App for hospital clients from scratch with a fast release cycle.
- In charge of the App QA, automation testing, and release process.

Senior Software Engineer, Mozilla — April 2019 - Oct 2020

- Worked with the Firefox Lite team and focused on improving user retention and MAU by implementing A/B testings and new features.
- Refactored the code base with Kotlin, MVVM, and Clean Architecture.
- Migrated the web browser engine interface using Firefox Android Component.

Android Squad Leader, Grindr — Jan 2018 - April 2019

- Served as a six-member squad leader in Beijing and Taipei office to optimize and deliver new features for the dating App with 2.5 million DAU.
- Measured and optimized the App and page launch time by ~30% aiming for the P90 users.
- Helped to build the Taipei android team in Q3 2018.

Senior Android Engineer, Loopd (acquired by Aventri) — Nov 2014 - Oct 2017

- In an independent role for the Android side, conceptualized, designed, and developed Apps / SDKs from the ground up for the event operators and customers.

Software Developer, Waystorm — May 2012 – Oct 2014

- Performed software development for one of the largest mobile advertising networks in Taiwan. And also contributed to several outsourcing projects, including App and website of a department store and movie theater.
